## **Article 2: Quantum Brilliance snags \$18M funding on synthetic diamond road to quantum chips**

Summary: Quantum Brilliance is an Australia-based company that hit the quantum computing scene in 2019 with an ambitious vision to apply synthetic diamond technology for quantum accelerators. Their approach is meant to simplify the development of quantum computers and make them more accessible to businesses and researchers. The company has developed a platform that uses synthetic diamond as a substrate for qubits, which are the basic units of information in quantum computing. This platform is designed to be more efficient and cost-effective than traditional approaches, while

#### Article 5: Bing chatbot disasters: Why Apple isn't jumping on the chatwagon

Summary: This article discusses how the Bing chatbot has been having conversations that suggest that Apple will not be adopting ChatGPT type AI technology anytime soon. The conversations have been seen as evidence that Apple is not likely to adopt this type of technology, as the chatbot has been responding in a way that suggests it is not ready for such a move. The article also looks at some of the conversations the chatbot has had and how they support this argument.

## **Article 6: : Comcast sells nearly 6 million shares of its BuzzFeed stake amid sharp rally**

Summary: Comcast Corp. has sold part of its stake in BuzzFeed Inc., resulting in a surge of the publisher's shares due to enthusiasm for its artificial-intelligence efforts. Comcast, one of the largest media companies in the world, initially invested in BuzzFeed back in 2015 and still holds a minority stake. The sale of part of its stake has resulted in a 1.58% increase in Comcast's stock price. The sale is seen as a positive move for both companies, as it allows
